SUMMARY OF TELEPHONE CONVERSATION:

The Flammable Fabrics Act Task Force is developing a program which would help assure that garments sold in the U.S. are in compliance with the Standard for the Flammability of Clothing Textiles 16 CFR 1610.

Myron Meche began the call with a discussion of the July 31 Minutes. No changes were made.

We then discussed the ASTM letter. Kay Villa stated that if the letter could be out by October 19th, she could assist in discussing it with the D-13 Committee. CPSC stated that they would try to get the letter out soon. It was agreed that the co-chairs would sign the letter and that it would be endorsed by the other members.

CPSC stated that they are planning to have the CPSC statistical staff review the reasonable and representative testing as described in Part 1611.

CPSC also brought up another issue related to the possible need for training of test labs. Kay Villa was concerned about reaching import laboratories.

The next scheduled conference call with the main task group is: Thursday September 11th at 10:00am EDT.
